SCHEDULE B

UNDERWRITING INFORMATION

This schedule contains additional underwriting information.

The following pages indicate:

(a) Loss Prevention Safety Program	2
(b) Stadium and Other Structures at Various State Universities & Colleges	4
(c) School Exposures	7
(d) Hospital Exposures	10
(e) Estimated Total Number of Vehicles and Estimated Number of State Miles Maintained.	11
(f) Dept. of Public Safety and Corrections	12
(g) Automobile Liability Loss Prevention	13
(h) Small Boats (26 Feet and Under)	14
(i) Rowboats.....	15
(j) State-Owned Buildings Over Two Stories	16
(k) Swimming Pools Owned or Used by the State.....	29

(a) Loss Prevention Safety Program

In an effort to reduce the human suffering and high cost associated with accidents, the Loss Prevention Unit of ORM currently assists all State Departments, Agencies, Boards and Commissions in complying with the Statutory requirements under R.S. 39:1543 and 1544. The complete Loss Prevention Manual can be found on the InfoLouisiana website at the following address: <http://www.state.la.us/orm/lpmanual.htm>. The Loss Prevention Staff presently audits safety and loss control programs for compliance with the Sixteen Point Components of a Safety Management Plan listed below:

1. Management Safety Policy Statement - An expression of management, philosophies and goals toward safety.
2. Responsibility for Safety in an Organization - A written document to clearly define supervisory responsibilities at all levels.
3. Inspection Program - A program to maintain a safe work environment and control unsafe acts.
4. Job Safety Analysis - A procedure used to review job methods and hazards that relate to the work environment. The job safety analysis should be performed on all tasks or processes that have a higher than normal rate of producing bodily injury or property damage. It uncovers hazards that 1) were overlooked in the design of the building, work station, machinery, equipment tools or processes, 2) developed after the procedure was originally designed, and/or 3) resulted from changes in work procedures or personnel.
5. Investigation Program - A program to thoroughly investigate and identify as soon as possible the actual causes and contributing factors of losses in an attempt to prevent recurrences.
6. Safety Meetings - Meetings to be conducted by supervisors with employees on a quarterly basis unless otherwise specified by ORM to educate, inform, motivate and examine work practices for potentially unsafe acts that could produce bodily injury and provide a method to preclude recurrences.
7. Safety Rules - General instructions developed by agencies regarding the employees' responsibilities.
8. Employee Safety Training - Training to establish a systematic method of training employees to perform the required tasks in a safe and efficient manner and to insure all employees receive periodic refresher training.
9. Record Keeping - Records to establish a procedure for the uniform development and maintenance of loss prevention and control documents to be retained for one year. This will include inspection reports, accident investigation reports, minutes of safety meetings, training records, and boiler and machinery maintenance records.
10. First Aid - Adoption of a first aid program which will provide a trained first aid person at each job site and shift. This policy covers all facilities and crews.
11. Housekeeping Program - Program to provide a method of systematically inspecting and eliminating safety and fire hazards that result from uncontrolled sources. To establish clearly defined areas of responsibility for orderliness and cleanliness through each State-owned or operated grounds and facilities.
12. Hazard Control Program - Program to establish a systematic method of recognizing, evaluating, and controlling hazards, prior to their producing injury, illness, or property damage.

PROPOSAL NO.	*	INVITATION FOR BID	*	DATE	*	PAGE
	*	<i>SCHEDULE B</i>	*		*	
EXL-08	*	<i>UNDERWRITING</i>	*	May 4, 2005	*	3 of 29
		<i>INFORMATION</i>				
		** THIS PAGE DOES NOT HAVE TO BE RETURNED **				

13. Equipment Management Program - Written Loss Prevention maintenance program to include but not limited to, a history of each piece of equipment, designate responsibility, schedule of when maintenance is to be performed, list of equipment to be maintained, how maintenance is to be performed.
14. Driver Safety Program - Program to provide a systematic method of screening, training and accountability for employees and supervisors required to assign or drive state-owned vehicles or personal vehicles in the course and scope of their employment.
15. Water Vessel Operator Safety Program - Program to provide a systematic method of screening, training and accountability for employees and supervisors required to assign or operate state-owned water vessels in the scope of their employment.
16. Any other loss prevention program developed by the Office of Risk Management, Loss Prevention Unit for the prevention and reduction in accident events that may cause injury, illness, or property damage.
 - A. Bonds and Crime
 - B. Flight Operation Program

The minimum requirements are in no way intended to require revisions of existing safety plans which meet or exceed these minimum requirements. However, these existing plans are to be submitted to ORM Loss Prevention Unit.

ORM Loss Prevention Unit will audit each department, agency, board or commission to insure compliance of the development, implementation, and adherence to the program. Audits will be conducted once a year or more often upon written request of the department, agency, board or commission. The deadline for certification will be June 30 of each year for insurance premiums for the following fiscal year. If an agency, board or commission is determined to be in compliance, the bureau will issue a certificate of compliance which will result in a five percent credit in the calculation of premiums. Such compliance will be certified by major risk groups as follows:

1. Workers' Compensation - Regular
2. Workers' Compensation - Maritime
3. General Liability
4. Auto Liability and Auto Physical Damage
5. Property and Inland Marine
6. Boiler and Machinery
7. Bond and Crime Risk
8. Aviation
9. Marine

The following tools will be utilized in assisting all Departments, Boards and Commissions in reducing exposure and losses:

- Establish baseline X nationally comparable experience for accident events and severity of losses by Standard Industrial Classification Codes.
- Tabulate and analyze accident causation.
- Summarize accident event and causes and trends. Provide suggested controls to be implemented to reduce recurring accident events to acceptable risk level.
- Loss Prevention Officers will share responsibilities with the agency Administrator for effecting a reduction in recordable incidents and accident cost per man hour worked, including cost of loss prevention Controls.

(g) Automobile Liability Loss Prevention

As of January 15, 2005

ORM undertakes the task of providing Defensive Driving Training to all state employees. In order to accomplish this, ORM trains Defensive Driving instructors in the following listed departments. In 1997, ORM upgraded the program to include advanced training, tighter qualifications and higher accountability standards for agency instructors. ORM received the 1997 National Safety Council Training Achievement Award for this program.

<u>Department</u>	<u>Instructors Trained</u>
